

How To Do Theology Reflection (pt. 1)

Purpose:

This reflection will help you process the large amount of material from this module. You will interact with different aspects of the process of moving from the Bible to application in theology, and you will form your own skills and understanding of the whole process. Ideally, you will demonstrate understanding of the separate theological disciplines and the theological process. Ideally, you will thoughtfully interact in more depth with at least some aspect of the theory underlying theology, some aspect of the process of Bible Study, and some aspect of application.

Expected Content:

Think through (and write out if you find writing helpful for your mental process) the one or more items that most stood out to you from this week's material. Ensure that the following points are addressed:

- What is/are the idea(s) or concept(s) that you found most important and relevant?
- Describe the content and meaning of each item.
- Why did each item stand out to you as important for developing your theology?
- In what ways were you informed and/or challenged?
- How will this influence the way you read the Bible and do theology?
- How will this impact your discipleship and ministry?
